When Alexander Fleming was sixteen, he had to work to earn his living. He found a job in a shipping office in London. The wages were small and the work rather uninteresting. He also worked as a volunteer soldier on weekends and holidays. It was soon discovered that the sturdy young man from Scotland was a fine shot and a very good swimmer.

Just afterwards, a relative died, leaving him a small but useful sum of money. His brother Thomas advised him to give up the job at the shipping office and spend the money on his training as a doctor. Alexander said later, "My brother Thomas pushed me into medicine."

So he joined St. Mary's hospital school. He attended lectures and watched operations, he also swam and acted in plays. Yet he was always the top student in the examination. The rain had fallen, the poet rose
He passed by the town and out of the street,
A light wind blew from the gates of the sun,
And waves of shadow went over the wheat,
And he sat him down in a lonely place
And chanted a melody loud and sweet
That made the wild swan pause in her cloud,
And the lark drop down at his feet,
The swallow as he haunted the fly
The snake slid under a spray.

The wild hawk stood with the swan on his beak
And stared with his foot on the prey.
And the nightingale thought, "I have sung many songs"
But never a one so gay.

3 Read the passage carefully and answer the questions given below it :

Why is it that there are very few women players in our orchestras ?
If one could reply flatly - sex determination : they don't want women in
orchestras - that would be a definite answer. But one can't say that.
As a matter of fact there are, if not many, a few women playing today in
symphony orchestras. Nevertheless, it is true that male orchestral players are
in an overwhelming majority. Why is that ? I'm afraid, there is no one to
answer. There are physical reasons why women don't perform well on certain
instruments. The average woman is not likely to possess sufficient lung
power and sheer muscular strength to play the tuba just as an average woman's
hands are not likely to be large enough to finger a double bass satisfactorily.
But what about the other instruments ?

I think social and family pressure have been very strong in keeping women out of orchestras. Think of the prejudice that existed half a century ago against the so called 'nice' girls going on stage. The stage was won out for the simple reason that it had to have women to play feminine roles in plays and operas, and was willing to offer a young woman more money than she could make in any other profession. Moreover, on stage, she was appearing as an individual, as a centre of attraction. This was gratifying to both her and her family. To this day, while the average parents are reconciled to seeing their daughter become an opera singer or concert artist, they don't like the idea of seeing her submerging her personality to become the member of a chorus of the orchestra.

Questions :

- (a) The word similar in meaning to 'a group of musicians' is - 1
 (i) orchestra (ii) chorus
 (iii) stage (iv) melody
- (b) Say 'True' or 'False' - 1
 As a matter of fact there are absolutely no women playing today in symphony.
- (c) The meaning of majority is - 1
 (i) very few in number (ii) dozen
 (iii) maximum in number (iv) a score
- (d) What is the prime reason for a few number of women in orchestras ? (in one word) 1
- (e) What are the genetic deficiencies in women for playing instruments ? 2
- (f) What are the reasons according to the narrator that keep women away from orchestras ? 2
- (g) What are the changing behaviours of parents now-a-days ? 2
- (h) Why were the parents not willing for women to appear on a stage ? 2
- (i) Why was the stage won out ? 2
